OFFICE ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “current mirror” (claims 2-5 recite a circuit arrangement with a current mirror when none of the drawings show any current mirrors) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 1 is objected to because of the following informalities: line 2, ' the laser' should be 'a laser' and line 7, 'a laser' should be "the laser". Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how an op amp driving a single FET can be a current mirror in the conventional sense (in the specification). (see http://en.wikipedia.org/wiki/Current_mirror).

The claim is rejected "as best understood by the examiner based on the drawing figures and written specification".

Claims 2-10 recite the limitation of "a laser" in the claims. There is insufficient antecedent basis for this limitation in the claim. Therefore, they are all rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2828

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tsuchiya et al.

(5179565).

Fig.1-2 show a compatible optical scanner , which is compatible with an optical scanner in which a bias current of the laser 38 is modulated for recording or reproduction apparatuses of optical recording media, comprising:

a laser modulator 44 that at least partly or completely switches the laser current and

a means for simulating (LEVEL input) the input characteristic curve of a laser at an input of said laser modulator.
